

Plastic Containers 1-7 Now Recyclable

Includes Margarine and Yogurt Tubs, Medicine Bottles

Circle Pines Residents may now recycle plastic containers, including their lids, with numbers 1 to 7 inside the triangular recycling symbol on the bottom of the container. Each number represents a different type of plastic.

Common recyclable plastic containers include soft drink and water bottles, salad dressing and cooking oil bottles, liquid laundry detergent bottles, shampoo and conditioner bottles, juice bottles, bleach bottles, medicine bottles, margarine tubs, yogurt tubs and milk jugs.

Make sure plastic containers are clean before recycling them. One product with food waste still in it can contaminate an entire bale containing thousands of pounds of collected plastics, causing it to go to the landfill instead of being recycled.
